

HOUSTON, MISSION ACCOMPLISHED

The entire vehicle will receive a good scrubbing as the high pressure water creates friction upon impact with the vehicle's surface.

Presoak nozzles are independent of the high pressure nozzles providing an effective and efficient delivery system.

The scrubbing, oscillating nozzles sweep back and forth as the wash gantry passes over the vehicle.

OUR MISSION: To build a tough, durable touchfree automatic car wash that will deliver a clean car consistently. We have accomplished that with the **WATER WIZARD**. It's not *rocket science* behind the engineering of the unique oscillating, high pressure nozzles and adjustable height, but experienced *car wash science* from nearly 40 years of manufacturing. The many features and options make the **WATER WIZARD** a shining star. For a **FREE CD or brochure**, visit us at www.jcolemanco.com or call us toll free at **800-999-9878**.
