

# Turn Water Into Money!

## Get Your **FREE** copy of Jim Coleman Company Investment Guide to Successful Carwashing

**W**hile many businesses may produce profits, the self-service car wash business will bring profits much more pleurably. The car wash industry is a unique one. It offers high income potential by allowing for low labor cost and inventory.

Owning a car wash can be expanded into related areas such as full service, exterior automatic and detail centers. The self service car wash is an industry which offers car cleaning services to the motoring consumers who can wash their own vehicle. By vehicle, we mean that you can wash cars, trucks, boats, campers or anything that is portable. With this in mind, imagine how many "dirty" vehicles are in your area alone! In the beginning, self-service car washes offered limited services which were simply high pressure wash and rinse with vacuums for the inside of the vehicle. Today, the car wash facility has developed into a complete car care center with a wide range of services and income producing options including in-bay touchless automatics.
